Since 1963 Senninger products have been constructed entirely of engineering-grade thermoplastics for strength and durability. They are warranted for two years on materials, workmanship and performance. Nozzles are colorcoded for easy size identification and warranted to maintain correct orifice size for five years.

Figures reflect data from tests performed in accordance with the American Society of Agriculture and Biological Engineers (ASABE) standard S398.1.Consult factory for availability of other nozzles.

Upright&Inverted]Mister™

FEATURES:

- Outstanding uniformity
- Bridge-less design for uninterrupted 360° pattern
- Easy to clean nozzle and check valve, quick twist tool-free disassembly
- · Multiple connection options to retrofit existing systems
- · Color-coded nozzles
- Engineering-grade UV-resistant t hermoplastic construction
- Built-in check valve (inverted models)
- Minimum operating pressure 30 psi or 2 bar

The NEW patented Senninger Mister is designed specifically for propagation or other low volume misting application. Innovative internal check valve prevents draining from inverted models immediately following each irrigation session. It also provides consistent system start-up delivering an instantaneous, highly uniformdistribution ideal for short-cycle applications.

SuperSpray® [Sprays

The Super Spray's interchangeable deflector pads allow customization of spray angle and droplet size.

- FEATURES:
 For upright or inverted installations
- Standard inlet: 3/4" or 1/2" NPT male
- Flow rates: 0.54 to 6.54 gpm [130 to 1548 L/hr]
- Deflector pads available in flat, concave, convex and smooth, medium-grooved or deep grooved
- Two-year warranty on materials, workmanship AND performance
- · Color-coded nozzles for easy size identification /warranted to maintain correct orifice size for five years

Sprinkler performance may vary with actual field conditions. Performance data shown is based on the Super Spray being used with the flat smooth deflector pad. Other nozzle sizes and deflector pads are available; consult factory for specific performance data. Stream height is approximately the same as the nozzle height when using the flat smooth deflector pad under no wind conditions. Minimum recommended riser height is 1.5 ft. (0.46 m).

SprayStakes

Senninger Spray Stakes are an intelligent choice for in-container irrigation.

FEATURES

- · Directional indicator for easy positioning
- Easy to remove for cleaning and maintenance
- · Shut-off feature for non-use
- · Large flutes for increased stability in soil
- Three color-coded flow rates to match application requirements
- Deflection surface provides a good application pattern
- Two-year warranty on materials, workmanship AND performance

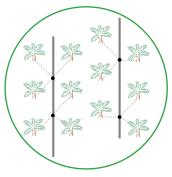

[For use with 0.125" I.D. Tubing]

Black Stake 90°	Brown Stake 120°	Green Stake 160°

Emitter Selection-based on container size or area

Container Size	Radius of Coverage	Spray Stake	Flow @20 psi [1.38 bar]	Distribution Pattern
10 gallon	12" [0.31m]	black	4 gph [15.1 lph]	90 Degrees
15 gallon	18" [0.46m]	brown	8 gph [30.3 lph]	120 Degrees
30 gallon	20" [0.51m]	green	12 gph [45.4 lph]	160 Degrees

The Triad is an excellent alternative to micro-irrigation. It's a unique 3-stream sprinkler for orchard irrigation that's ideal for irrigating small root zones associated with young trees.

The Senninger Triad uses one line of polyethelene tube every other row and one emitter for every three trees.*

FEATURES:

- Recommended for oil palms, pecans, coconuts, mangos, citrus, walnut and other fruit trees.
- 3 adjustable nozzles for precise direction and trajectory control.
- 3/4" slip F base solvent-welds directly to PVC riser, eliminating the need for a connecting fitting.
- Requires less filtration than traditional micro-irrigation.
- Reduces the number of laterals required by 50% compared to micro sprinklers.
- Fewer lateral requirements allow greater access to trees for harvesting and orchard maintenance.

^{*} Tree diking is recommended for best water retention. ** Flow rate is for all three nozzles combined. Riser height is 1.5ft. (0.46m)

SmoothDrive[™][Non-Impact

Shadows created by fixed bracket legs

Smooth Drive

Walking diffuser eliminates leg shadows

Ordinary rotating sprinklers have stationary legs that block

The Smooth Drive's walking diffuser eliminates bracket leg

shadows resulting in unobstructed uniform distribution.

water and create leg shadows (drier areas).

Senninger's new Smooth Drive is designed for under-tree, open-field and nursery irrigation. Its unique "walking diffuser" helps deliver an extremely uniform pattern, without distortion from bracket legs.

FFATURES:

- Precision-contoured deflector provides greater throw and enhanced distribution
- Advanced braking mechanism for smooth, consistent rotation speed and minimal riser stress
- Rugged design stands up in harsh field conditions
- User friendly method of assembly no tools required for accessing nozzle
- Flow rates: 1.22 to 2.79 gpm [279 to 633 L/hr]
- Operating pressures: 25 to 40 psi [1.75 to 2.75 bar]

• Standard Inlet: 1/2" M NPT; Optional Inlet: Combination 1/2" socket and 3/4" spigot, solvent-weld base for theft resistance

- Two-year warranty on materials,workmanship AND performance
- Color-coded nozzles for easy size identification /warranted to maintain correct orifice size for five years

Sprays]**T-Spray**™

The Senninger T-Spray delivers a fine spray – ideal for delicate stock. It can be mounted upright or inverted and is also available in a high angle model for upright installations only.

FEATURES:

- 360° Spray nozzle.
- No moving parts for longer life
- High-angle upright T-stem provides larger diameter of coverage
- · Removable T-stem for easy cleaning
- Color-coded stems for easy size identification
- Flow rates: 0.98 to 2.85 gpm [216 to 684 L/hr]
- Operating pressures: 15 to 40 psi [1.0 to 3.0 bar]
- Inlet: 1/2" M NPT male
- Two-year warranty on materials, workmanship AND performance

mini-Wobbler® [Wobblers

SEE PG. 34 FOR RISER ADAPTER!

The Senninger mini-Wobblers employ the same unique off-center rotary-action as the standard Wobbler. It provides extremely uniform coverage over a large diameter at low pressures.

FEATURES:

- Low evaporative loss.
- Multi-level throw, approximate angle: 10°
- Color-coded nozzles for easy size identification
- Flow rates: 0.42 to 2.61 gpm [97 to 576 L/hr]
- · Operating pressures: 15 to 35 psi [1.0 to 2.5 bar]
- Inlet: 1/2" M NPT
- Two-year warranty on materials, workmanship AND performance
- · Color-coded nozzles for easy size identification /warranted to maintain correct orifice size for five years

The mini-Wobbler can be mounted on the Riser Adapter for installation versatility. [see pg. 34]

i-mini-Wobbler® [Wobblers

The Senninger i-mini-Wobblers employ the same unique off-center rotary-action as the standard Wobbler. It produces a broad, rain-like application.

FEATURES:

- · Low evaporative loss.
- Multi-level throw, approximate angle: 0° inverted
- · Color-coded nozzles for easy size identification
- Flow rates: 0.75 to 2.61 gpm [176 to 576 L/hr]
- Operating pressures: 20 to 35 psi [1.5 to 2.5 bar]
- Inlet: 1/2" M NPT
- · Two-year warranty on materials, workmanship AND performance
- · Color-coded nozzles for easy size identification /warranted to maintain correct orifice size for five years

The Inverted mini-Wobbler produces a broad, rain-like application.

Wobblers® [Standard&Low Angle

Standard-Angle

NOTE:

Care must be taken to stabilize the riser. For other installation details, contact our factory.

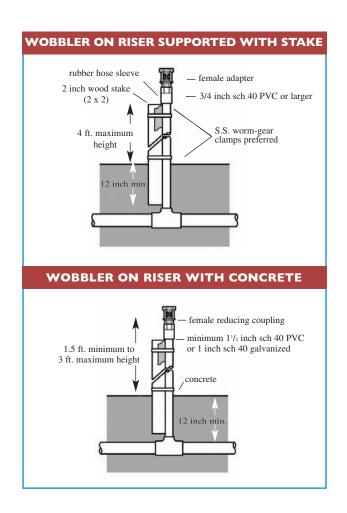

Low-Angle

The Senninger Wobbler has a unique offcenter rotary-action. This design provides extremely uniform coverage over a large diameter at low pressures.

FEATURES:

- Only one moving part for longer life
- Built for strength and durability
- Flow rates: 0.78 to 8.25 gpm [180 to 1908 L/hr]
- Low evaporative loss
- Inlet: 3/4" and 1/2" M NPT
- Two-year warranty on materials, workmanship AND performance
- · Color-coded nozzles for easy size identification /warranted to maintain correct orifice size for five years.

Standard&Low Angle] Wobblers®

The Wobbler produces droplets which resist wind drift.

Xcel-Wobbler® [Wobblers

High-Angle New Increased Diameter

Senninger's Xcel-Wobbler maximizes the area of coverage. Its unique off-center rotary action provides extremely uniform coverage at low pressures with a very low evaporative loss.

FEATURES:

- Counter-balance design produces smooth, stable performance
- · Only one moving part for longer life
- Inlet sizes 3/4" or 1/2" M NPT
- Flow rates: 0.78 to 6.97 gpm [180 to 1584 L/hr]
- Low wind drift and evaporative loss at low pressures
- Two-year warranty on materials, workmanship AND performance
- Color-coded nozzles for easy size identification / warranted to maintain correct orifice size for five years

Mid-Angle New Look & Stronger Design!

The Xcel-Wobbler provides a maximized area of coverage for under-tree applications and nursery canopy applications.

Wobblers]Xcel-Wobbler®

Fixed Spray Xcel-Wobbler [High Angle] The larger area of instantaneous application of the Xcel-Wobbler minimizes the impact on the soil structure, helping to maintain

infiltration capability.

Sprinkler performance may vary with actual field conditions. Other nozzle sizes are available; consult factory for specific performance data. Stream heights range from 2.5 - 5.5 ft (0.8 - 1.7 m) above nozzle based on pressure and nozzle size. Minimum recommended riser height is 1.5 ft. (0.46).

20series Impacts

Other Models:

- · Wedgedrive for lower application rates.
- Aluminum Arm resists icing during freezing temperatures.

2009HD-I-I/2" M

The 20 series full-circle impacts are Senninger's most economical sprinklers. Effective for various overhead and undertree applications.

FEATURES:

- Single nozzle design for maximum throw
- Three trajectories available:
- 2009 9°- fights wind drift and evaporation
- 2014 14°- ideal for undertree irrigation
- 2023 23°- for maximum throw on overhead systems
- · Wide range of nozzle and vane combinations for excellent distribution at all pressures
- · Built-in hex wrench for easy in-the-field maintenance
- Standard lower bearing pipe thread: 1/2" M NPT (female also available)
- Flow rates: 1.22 to 3.98 gpm [288 to 900 L/hr]
- · Color-coded nozzles for easy size identification /warranted to maintain correct orifice size for five years
- Two-year warranty on materials, workmanship AND performance

Diam. at 1.5' ht. [ft.]	64	66	68	70	71	Diam. at 0.5m ht. [m]		19.4	20.3	21.2	21.7

Sprinkler performance may vary with actual field conditions. Diameters shown are for standard straight bore nozzles and stream straightening vanes. Other nozzles and/or vane combinations are available; Consult factory for specific performance data. Stream heights range from 1.5-3.0 ft. (0.46-0.9m) above nozzle based on pressure and nozzle size. Minimum recommended riser height is 1.5 ft. (0.46m).

Impacts]20series

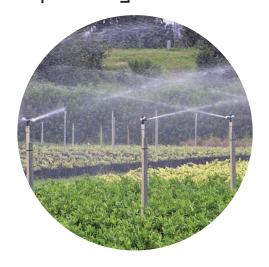

Mounting Options:

- Vandal-resistant coupling and special wrench
- 3/4" slip with base swivel
- Quick-connect base and connector

30series[Impacts

The 30 Series begins Senninger's line of full-circle 3/4" impact sprinklers. Designed specifically for lower flows and maximum efficiency.

FEATURES:

- Single and double nozzle designs available. Double nozzle only available in 23° model.
- Two trajectories available:
 3012- 12° ideal for undertree irrigation
 3023- 23° for maximum throw on overhead systems
- Wide range of nozzle and vane combinations for excellent distribution at all pressures
- Built-in hex wrench for easy in-the-field maintenance
- Standard lower bearing pipe thread: 3/4" M NPT (female also available)
- Flow rates: 1.84 to 6.42 gpm [0.11 to 0.41 L/s]
- Color-coded nozzles for easy size identification /warranted to maintain correct orifice size for five years
- Two-year warranty on materials, workmanship AND performance

40series[Impacts

The 40 Series full-circle impacts are designed for maximum efficiency at intermediate flows.

FEATURES:

- Single and double nozzle designs available. Double nozzle only available in 23° model.
- Two trajectories available:
- 12° ideal for undertree irrigation
- 23° for maximum throw on overhead systems
- Wide range of nozzle and vane combinations for excellent distribution at all pressures
- Built-in hex wrench for easy in-the-field maintenance
- Standard lower bearing pipe thread: 3/4" M NPT (female also available)
- Flow rates: 3.82 to 12.6 gpm [0.24 to 0.78 L/s]
- Color-coded nozzles for easy size identification /warranted to maintain correct orifice size for five years
- Two-year warranty on materials, workmanship AND performance

Sprinkler performance may vary with actual field conditions. Diameters shown are for standard straight bore nozzles and stream straightening vanes. Other nozzles and/or vane combinations are available; Consult factory for specific performance data. Stream heights range from 6.5-10.0 ft. (2.0-3.1m) above nozzle based on pressure and nozzle size. Minimum recommended riser height is 1.5 ft. (0.46m).

50series[Impacts

The 50 Series full-circle impacts handle the highest flow rates for Senninger's 3/4" sprinklers. High application rates and large diameter of coverage make these sprinklers suitable for a variety of applications.

FEATURES

- Single and double nozzle designs available. Double nozzle only available in 23° model.
- Two trajectories available: 12° - ideal for undertree irrigation
- 23° for maximum throw on overhead systems
- Wide range of nozzle and vane combinations for excellent distribution at all pressures
- Built-in hex wrench for easy in-the-field maintenance
- Standard lower bearing pipe thread: 3/4" M NPT (female also available)
- Flow rates: 6.5 to 20.1 gpm [0.4 to 1.27 L/s]
- Color-coded nozzles for easy size identification / warranted to maintain correct orifice size for five years
- Two-year warranty on materials, workmanship AND performance

Stream heights range from 7.0-11.5 ft. (2.1-3.5m) above nozzle based on pressure and nozzle size. Minimum recommended riser height is 1.5 ft. (0.46m)

Part-Circle[Impacts

Senninger's Part-Circle sprinklers are designed specifically for use where a directional impact sprinkler is required. Designed to deliver maximum efficiency at low to moderate flow rates for agriculture, nursery, effluent disposal, dust suppression, and industrial applications.

FEATURES:

- Distributes water in a 60° 360° pattern at 5° increments
- 23° nozzle trajectory for maximum radius of throw
- Wide range of nozzle and vane combinations for excellent distribution at all pressures
- Standard lower bearing pipe thread 3/4" M NPT
- Flow range: 2.42 to 16.8 gpm [0.15 to 1.04 L/s]
- Color-coded nozzles for easy size identification warranted to maintain correct orifice size for five years
- Two-year warranty on materials, workmanship AND performance

Part-circle impact sprinklers can be adjusted to match the desired area of coverage.

Sprinkler performance may vary with actual field conditions. Radius shown is for standard straight bore nozzles and stream straightening vanes. Other nozzles and/or vane combinations are available; Consult factory for specific performance data. Stream heights range from 6.0-10.0 ft. (1.8-3.1m) above nozzle based on pressure and nozzle size. Minimum recommended riser height is 1.5 ft. (0.46m).

70series[Impacts

The 70 Series full-circle impacts distribute water over a large diameter for higher volume systems.

FEATURES:

- Single and double nozzle designs available.
- Outlasts and costs less than brass sprinklers
- Built-in hex wrench for easy in-the-field maintenance
- Lower bearing pipe thread: 1" M NPT, 1" F NPT; 1" M BSP also available
- Flow rates: 8.11 to 39.1 gpm [0.52 to 2.5 L/s]
- Color-coded nozzles for easy size identification /warranted to maintain correct orifice size for five years
- Two-year warranty on materials, workmanship AND performance

Sprinkler performance may vary with actual field conditions. Diameters shown are for standard straight bore nozzles and stream straightening vanes. Other nozzles and/or vane combinations are available; Consult factory for specific performance data. Stream heights range from 8.5-15.5 ft. (2.6-4.7m) above nozzle based on pressure and nozzle size. Minimum recommended riser height is 1.5 ft. (0.46m).

80series[Impacts

The 80 Series are Senninger's largest impact sprinklers. Designed for maximum efficiency at high flow rates.

FEATURES

- Single and double nozzle designs available. Double nozzle available in range drive (HR) or spreader drive (SD)
- Outlasts and costs less than brass sprinklers
- Lower bearing pipe thread:1¼" M NPT, 1¼" F NPT; 1½" M NPT, 1¼" M BSP
- Flow rates: 23.6 to 106.8 gpm [1.51 to 6.62 L/s]
- Built-in hex wrench for easy in-the-field maintenance

Sprinkler performance may vary with actual field conditions. Diameters shown are for standard straight bore nozzles and stream straightening vanes. Other nozzles and/or vane combinations are available; Consult factory for specific performance data. Stream heights range from 12.5-28.0 ft. (3.8-8.5m) above nozzle based on pressure and nozzle size. Minimum recommended riser height is 1.5 ft. (0.46m).

Impacts]80series

FEATURES: continued...

- Color-coded nozzles for easy size identification /warranted to maintain correct orifice size for five years
- Two-year warranty on materials, workmanship AND performance

8025-SD The Booster Tube provides an increased radius of throw over standard range and spreader drive models by approximately 5 to 10%. Consult factory for specific performance data.

Available only on 8025 Spreader Drive double nozzle models.

Sprinkler performance may vary with actual field conditions. Diameters shown are for standard straight bore nozzles and stream straightening vanes. Other nozzles and/or vane combinations are available; Consult factory for specific performance data. Stream heights range from 12.5 - 28.0 ft (3.8 - 8.5 m) above nozzle based on pressure and nozzle size. Minimum recommended riser height is 1.5 ft. (0.46m).

PRLG[Regulators

The Senninger Landscape Grade Pressure Regulator is ideal for installations requiring lower flows [0.1 - 7.0 gpm] including lowvolume and sprinkler irrigation systems connected to outdoor hose bibb faucets or other lawn and landscape applications.

FEATURES:

- Maintains a constant preset outlet pressure while handling varying inlet pressures
- Prevents wasteful misting when using small nozzles
- Tamper-proof housing
- · Very low hysteresis and friction losses
- · Maximum flow path resists plugging
- 100% water-tested for accuracy (no adjustments ever needed)
- · Two-year warranty on materials, workmanship AND performance

Regulators]PMR-LF

The low flow Pressure-Master Regulator® is ideal for installations requiring lower flows [0.1 - 8.0 gpm] including solid-set, drip or other low-volume irrigation systems as well as center pivot and other mechanical-move irrigation systems.

FFATURES

- Maintains a constant preset outlet pressure while handling varying inlet pressures
- · Very low hysteresis and friction losses
- Maximum flow path resists plugging
- 100% water-tested for accuracy (no adjustments ever needed)
- Two-year warranty on materials, workmanship AND performance
- Can be installed above or below ground.

PMR-LF CMS models are designed specifically for mining applications where pH solutions are less than or equal to 4.0

PMR-LF EFF models (lavender top) are designed specifically for wastewater applications.

 $^{^{\}text{I}}$ Regulated pressure is 1/2 psi (0.03 bar) higher with increasing inlet pressure than with decreasing inlet pressure

Regulators PR-HF

The high flow Pressure Regulator is ideal for installations requiring higher flows [10 - 32 gpm] including solid-set sprinkler, low-volume, manifolds and mechanical-move irrigation systems.

FEATURES:

- Maintains a constant preset outlet pressure while handling varying inlet pressures
- · Very low hysteresis and friction losses
- Maximum flow path resists plugging
- 100% water-tested for accuracy (no adjustments ever needed)
- Two-year warranty on materials, workmanship AND performance

Pressure regulators are recommended if there is a 10% pressure and/or 5% flow variation. The lower a system's design pressure, the more critical it is to accurately control its pressure.

		PRESSUR	E VARIATIO	NS

All Senninger pressure regulators are constructed of durable high-impact engineering-grade thermoplastics with a high quality stainless steel compression spring and securing screws. This durable construction coupled with their outstanding design and precision parts make them suitable for a variety of different applications.

PRXF[Regulators

The Extended Flow Pressure Regulator is designed to handle flows up to 100 gpm. Ideal for installation requiring accurate zone pressure regulation.

FEATURES:

- Maintains a constant preset outlet pressure while handling varying inlet pressures
- Inlet / outlet configuration is 3" ID solvent weld socket x socket.
- · Very low hysteresis and friction losses
- Maximum flow path resists plugging
- 100% water-tested for accuracy (no adjustments ever needed)
- Two-year warranty on materials, workmanship AND performance

INSTALLATION GUIDELINES:

- Never allow solvent or cement to drip into regulator.
- Make sure the <u>flow arrows</u> on the regulator match the direction of the system flow.
- Installation of a union is recommended for easy removal of PRXF.

Regulators]PRLV

The Pressure Regulating Limit Valve™ is used in place of standard pressure regulators to limit static [no flow] water pressure when a shut-off valve is used downstream of regulation point. Limits downstream pressure and protects downstream components.

FEATURES:

- Maintains a constant preset outlet pressure while handling varying inlet pressures
- Limits downstream pressure to no more than 15 psi above regulated pressure rating during static (no flow) conditions
- · Very low hysteresis and friction losses
- · Maximum flow path resists plugging
- 100% water-tested for accuracy (no adjustments ever needed)
- One-year warranty on materials, workmanship AND performance

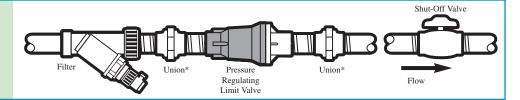

CAUTION:

Recommended for outdoor use only.

PRLV-50	50	3.45	150	10.35	0.5 - 15	113.4 - 3402.0	3/4" F, 1" F NPT	3/4" F, 1" F NPT

RiserAdapter [Accessories

The Riser Adapter's installation versatility makes it ideal for temporary portable systems.

FEATURES:

- · Allows sprinklers and sprays with 1/2" M NPT connection to be mounted securely on to either a 1/2" or 3/4" PVC or 5/16" steel rod stakes and connected to low pressure polyethylene laterals
- Allows for easy installation in hard-to-reach places such as side slopes
- · No gluing or fusing required
- Two models available: for 0.270" ID tubing or 0.345" ID tubing
- Available as individual components or as an assembly. (Assembly includes: Riser Adapter, three feet of tubing, and connection adapter.)
- · Friction loss through the assembly (using 0.345" tubing) is 1.25 psi at 1.5 gpm [0.1 bar at 0.1 L/s]

NurseryWire Adapter Accessories

The Nursery Wire Adapter provides easy installation for Misters or other non-impact applicators.

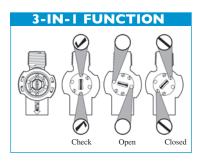

FEATURES:

- · Easy installation on wire mesh plant beds
- Fits up to 10 gauge wire
- · Locks into corner of wire
- Multiple installation options
- Minimum 1" mesh
- Specifications: 1/2" F slip/ 3/4" M slip; Barb fits 0.345" ID tubing

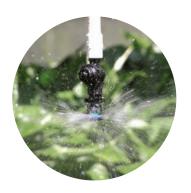

Accessories] DrainStopPlus™

Senninger's new Drain Stop Plus is specifically designed for overhead irrigation to prevent draining from applicators when system is shut down. This protects plants beneath applicators from damage and over-watering. The Drain Stop Plus allows lines to remain full to help expedite system start-up time and maximize initial zone coverage.

The multiple functions of Senninger's new Drain Stop Plus make it an excellent choice for overhead irrigation.

FEATURES:

- Unique 3-mode design open, check, and closed
- Easy clean feature device and applicator remain in place, a simple twist releases bonnet for debris removal
- Two models available:1/2" M NPT inlet x 1/2" F NPT outlet; 3/4" M barb inlet x 1/2" F NPT outlet
- Can be used directly on any 1/2" M NPT base applicator
- \bullet Low friction loss less than 4.25 psi total loss through device at 5 gpm [0.29 bar at 19 L/m]
- Minimum opening pressure: 13.5 psi [0.93 bar] Minimum closing pressure: 3.5 psi [0.24 bar]
- Maximum operating pressure: 50 psi [3.45 bar]
- Flow: 0.25 to 5 gpm [1 to 19 L/m]
- Two-year warranty on materials, workmanship AND performance

Accessories] DropAdapter

The Senninger Drop Adapter offers simple, fast and economical installation of drops.

FEATURES:

- Available as an assembly or as individual components (assembly includes: Two super barb connectors, One 1/2" slip x NPT connector, 12 inches of 0.345" tubing, 12 inches of 1/2" PVC)
- Available with either a 1/2" F slip, 3/4" M slip, or 1/2" M NPT outlet connection
- Friction loss through the assembly (24" length) is 0.67 psi at 1.5 gpm [less than 0.05 bar at 0.1 L/s]

WinSIPP2™[Software

Use WinSIPP software by Senninger to calculate the precipitation rate of your irrigation system.

FEATURES:

- Aids in the selection and application of best irrigation products
- Tests the application uniformity of sprinkler layouts before the system is installed
- Compares different spacings, sprinkler models, nozzle sizes, and operating pressures to determine which would be best for your specific application

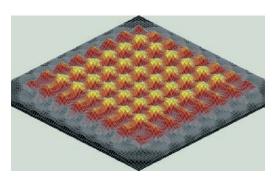

Ask for this program by contacting the Senninger Technical Support Department.

DISTRIBUTION PROFILES

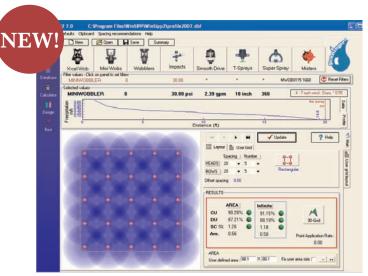

A distribution profile is the illustration of results from "catch can" tests performed in accordance with the American Society of Agricultural Engineers (ASAE) standard S398.1. This data shows how uniformly a device distributes water within its diameter of throw. WinSIPP utilizes the numerous distribution profiles available for Senninger products.

DENSOGRAMS

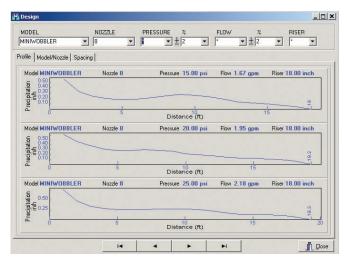

Data from distribution profiles is used to create densograms based on spacing dimensions, layout, and riser height. Densograms are useful in illustrating the uniformity in which water is distributed by multiple overlapping devices.

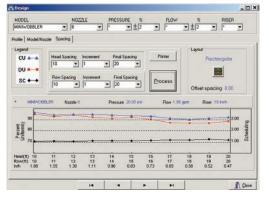

Graphics illustrate the water application pattern in 3-D format.

Densograms illustrate the uniformity of a given profile to show water distribution of multiple overlapping devices in graphic form.

Sprinkler profile takes specific data and illustrates the amount of water that would be delivered at various intervals as well as the exact radius.

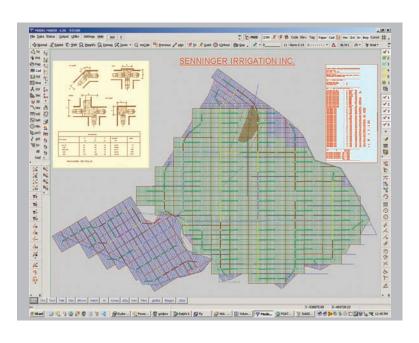

The WinSIPP program provides profiles illustrating the coefficient of uniformity, distribution uniformity, and the scheduling coefficient to determine which spacing would be optimum.

Software]Irri-Maker™

Senninger's Irri-Maker™ software evaluates installation alternatives in advance, surveys any terrain, produces a contour plan, draws the details, and applies the irrigation design.

FEATURES

- Optimizes irrigation system design by combining survey, Digital Terrain Modeling (DTM) and Computer Aided Design (CAD), with many hydraulic analysis functions
- Allows importation of information from many other programs
- · Saves time at repeatable routines

Survey Data Manipulation (DTM)

Irri-Maker's flexible structure and user-friendly layout makes converting survey data into a computerized DTM format quick and easy. It is no longer necessary to manually calculate coordinates, reduce survey field books, or do manual plotting of the proposed terrain. Irri-Maker can produce a contour plan from virtually any type of survey data.

CAD Advantages

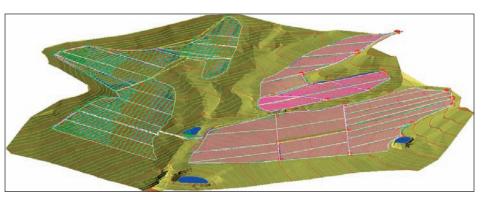

The built-in CAD module allows you to add specific details to the contour plan, including text and bitmap images. Details like roads, fences, boundaries, rivers, and trees can also be incorporated. Irri-Maker employs various modules working together with the same set of commands. There is no need to learn different programs or menu layouts to add CAD elements and irrigation designs to your contour plan. Everything can be plotted independently or in combination.

Flexible Irrigation Designs

Irri-Maker can be used for everything from simple irrigation designs to complex systems. Each element of the design can be controlled, whether it's defining block areas, adding emitters and pipes, sizing the pipes, or calculating the hydraulics. A comprehensive list of materials along with detailed hydraulic reports can be produced as well.

Other Applications

Irri-Maker operates within the larger Model Maker[™] environment. This means any of the other Model Maker modules can be added to your software package. With this, civil earthwork calculation tasks can be performed for various applications including dams, canals, drainage, and roads.

The program provides a three-dimensional model for your specific application.

5 mph or less	60% of wetted diameter
5-10 mph	50% of wetted diameter
over 10 mph	25-30% of wetted diameter

(Consult factory for specific information on uniformity based on your particular application)

Precipitation Rate Formula

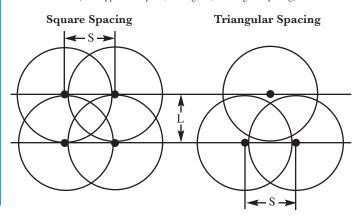

Application Rate = $\frac{\text{GPM x 96.3}}{\text{S x L}}$

GPM = flow per sprinkler

S = spacing of sprinklers along the lateral (in feet)

L = spacing between laterals (in feet)

(This applies to square, rectangular, or triangular spacing)

Nozzles

Nozzle and vane combinations are a critical factor in how a sprinkler performs. Senninger offers a wide range of nozzle and vane options to customize sprinklers for peak performance. For more information see our website.

FEATURES:

- Color-coded for easy size identification
- · Excellent durability
- Warranted to maintain correct orifice size for five years

NOTE: Half sizes (1/128th inch increments) are also available in some models. Range nozzles for 70 and 80 series sprinklers are not color-coded. Consult factory for more information.

Formulas [Estimation

Inside Diameters for PVC (IPSmm)

Size	125 [SDR-32.5]		160 [SDR-26]	200 [SDR-21]	
3/4"	_	_	_		0.950 in.	24.13 mm
1"	_	_	1.195 in.	30.35 mm	1.190 in.	30.22 mm
1-1/4"	_	_	1.532 in.	38.91 mm	1.502 in.	38.15 mm
1-1/2"	1.783 in.	45.29 mm	1.754 in.	44.55 mm	1.719 in.	43.66 mm
2"	2.229 in.	56.61 mm	2.193 in.	55.70 mm	2.149 in.	54.58 mm
2-1/2"	2.698 in.	68.53 mm	2.655 in.	67.44 mm	2.601 in.	66.07 mm
3"	3.284 in.	83.41 mm	3.230 in.	82.04 mm	3.166 in.	80.42 mm
4"	4.224 in.	107.29 mm	4.154 in.	105.51 mm	4.072 in.	103.43 mm
6"	6.217 in.	157.91 mm	6.115 in.	155.32 mm	5.993 in.	152.22 mm

10"	10.088 in.	256.23 mm	9.924 in.	252.07 mm	9.726 in.	247.05 mm
12"	11.966 in.	303.93 mm	11.770 in.	298.95 mm	11.536 in.	293.01 mm

Calculating Friction Loss of Pipe [Hazen - Williams]

Hf = 1045 $\frac{(GPM \div C)^{1.852}}{ID^{4.857}}$	Hf = 1.22×10^{12} (LPS ÷ C) ^{1.852} ID ^{4.857}			
Hf = Friction Loss in Feet of Water (head) per 100 Feet of Pipe	Hf = Friction Loss in Meters of Water (head) per 100 Meters of Pipe			
GPM = Flow (gallons/minute)	LPS = Flow (liters/second)			
C = Pipe Coefficient (PVC = 150; Aluminum w/couplers = 120; Galv.Steel/Asb Cement = 140; Cast Iron = 100)	C = Pipe Coefficient (PVC = 150; Aluminum w/couplers = 120; Galv.Steel/Asb Cement = 140; Cast Iron = 100)			
ID = Pipe Inside Diameter (inches)	ID = Pipe Inside Diameter (millimeters)			

Estimating System Pumping Requirements

	GP	M = IN x ACRES x 452.6 DAYS x HRS x EFF			LPS = CM x HA x 27.8 DAYS x HRS x EFF
GPM	=	Total flow required to operate system (gallons/minute)	LPS	=	Total flow required to operate system (liters/second)
IN	=	Net application depth per irrigation event (inches) *	CM	=	Net application depth per irrigation event (centimeters)
ACRES	=	Area to be irrigated per irrigation event (acres)	HA	=	Area to be irrigated per irrigation event (hectares)
DAYS	=	Number of irrigation days per irrigation event	DAYS	=	Number of irrigation days per irrigation event
HRS	=	Number of irrigation hours per day of irrigation event	HRS	=	Number of irrigation hours per day of irrigation event
EFF	=	System efficiency (see table below)	EFF	=	System efficiency (see table below)

Estimating Irrigation System	Efficiencies:
Arid Regions	65%
Semi-Arid Regions	70%
Semi-Humid Regions	75%
Humid Regions	80%

Estimating Brake Horse Power Required

BHP = GPM x TDH 3960 x EFF	BHP = LPS x TDH 102 x EFF
BHP = Brake horse power required	BHP = Brake horse power required
GPM = Flow required (gallons/minute)	LPS = Flow required (liters/second)
TDH = Total dynamic head (in feet)	TDH = Total dynamic head (in meters)
EFF = Pump efficiency stated as a decimal	EFF = Pump efficiency stated as a decimal

Warning – Disclaimer

This warranty is the full and complete product warranty and is expressly in lieu of any and all representations or warranties, expressed or implied, including any implied warranties of merchantability or fitness for particular purpose, whether arising from statute, common law, custom, course of dealing, usage of trade, or otherwise. No person has the authority to incur or assume for Senninger any other liability as to products manufactured by Senninger.

This warranty shall not apply to any product which shall have been repaired or altered in any way outside the Senninger factory so as to affect its use or operation as determined by Senninger, nor shall it apply to any such product which has been subject to misuse, negligence or accident, or has been operated contrary to Senninger's printed instructions.

Senninger shall not be liable for any consequential and incidental damages resulting from the use of said products or caused by any defects, failure or malfunction, whether a claim for such damages is based on warranty, product design, system engineering, contract negligence or otherwise. Senninger makes no warranty whatsoever with respect to products manufactured by others to which Senninger's products may be attached, whether or not warranted by such other manufacturers.

Materials & Workmanship

Products manufactured by Senninger Irrigation Inc. are warranted for a period of two years from date of original shipment to be free of any defects in material or workmanship, with the exception of PRLV and mining models, which are warranted for one year.

Performance

Products manufactured by Senninger and used for ag, turf and nursery irrigation are warranted to maintain their original nozzle orifice size for a period of five years. Senninger also warrants these products to maintain their original performance for a period of two years from date of original shipment when installed and operated in accordance with Senninger's written specifications and used for their ordinary purpose.

Repair or Replacement

If a product is suspected of failure under terms of the above provisions, it must first be reported in writing to the attention of the Material Review Engineer at the company's Clermont, Florida office. An authorization may then be issued to return the product(s), shipping charges prepaid, to Clermont for

inspection. If in the opinion of the Material Review Engineer the product has failed, a repair or replacement will be authorized as required.

Senninger's obligation with respect to the above provisions concerning material, workmanship and performance is limited to the repair or replacement of the particular product involved. Senninger is not obligated to pay for repairs or replacements made by anyone other than itself.

No labor allowances will be made for removal or replacement of said parts nor for any travel to and from the product to make said repairs or replacement without prior written authorization from an officer of Senninger Irrigation.

Suitability

There is positively no warranty relating to the fitness of the product(s) for any particular purpose or use. It is the sole responsibility of the purchaser to consider and analyze the product and its design to be suitable for specific applications.
